

WEB & Mobile **Application development**

Module – 01

Class-02

Saylani Mass IT Training Faisalabad

Basic Concepts

- People access websites using software called a **web browser**. Popular examples include Firefox, Internet Explorer, Safari, Chrome, and. Opera.
- When you ask your browser for a web page, the request is sent across the Internet to a special computer known as a **web server** which hosts the website
- **Front-end web development** is the development of the graphical user interface of a website, through the use of **HTML, CSS, and JavaScript**, so that users can view and interact with that website.

HTML Introduction

- ❑ HTML stands for Hyper Text Markup Language.
- ❑ HTML is the standard markup language for creating Web pages.
- ❑ HTML describes the structure of a Web page
- ❑ HTML consists of a series of elements.
- ❑ HTML elements tell the browser how to display the content
- ❑ HTML elements label pieces of content such as "this is a heading", "this is a paragraph", "this is a link", etc.

HTML Documents

<html>

<head>

<title>1st Website</title>

</head>

<body>

<h1> My First Heading </h1>

<p> My first paragraph </p>

</body>

</html>

About Elements
