Introduction To CSS

- CSS stands for Cascading Style Sheets
- CSS is used to design HTML tags.
- CSS describes how HTML elements are to be displayed on screen , paper, or in other media.
- It is a language used to design a webpage to make it attractive.
- Now , we will look at how to make your web pages more attractive, controlling the design of them using CSS.

Styling

❖ Inline CSS

```
<h1 style="background-color:
aquamarine;">Welcome To CSS Class</h1>
```

❖ Internal CSS

```
<style>
  h2{
    background-color:aquamarine;
  }
</style>
```

❖ External CSS

CSS Style Rules

Selector

p

{

color

:

red;

Property

Value

text-align: center;

}

Declaration

Selectors

- Universal Selector `* { }`
- ID Selector `#introduction { }`
- Class Selector `.note { }`
- Tag Selector `p { }`

CSS Comments

- ❖ Comments are used to explain the code, and may help when you edit the source code at a later date.
- ❖ Comments are ignored by browsers.
- ❖ A CSS comment is placed inside the <style> element, and starts with /* and ends with

```
/* This is a single-line comment */  
p {  
  color: red;  
}
```
